## 1. How do I - upload multiple files to an IBM Rational Requirements Composer project?

The User Interface (UI) does not allow for multiple file uploads.

### Answer

Drag and drop capabilities are enabled in the grid view when using Firefox as the browser. You can upload multiple files by dragging them from your desktop or other file browser (such as Windows Explorer) on to the grid view. Ensure, if you are using Windows 7, that the files being uploaded are not empty or they will not be uploaded.
